ROCK CAMERA

The latest **premium camera**
156 megapixels
made-in i2S camera
development laboratory

More **efficient**
High-end images, faster
An unprecedented
level of quality

Unique **BoostPic™** and
True Color technologies
inside

Certified

Camera ROCK 50mm suitable for:

CopiBook **OS A2**

CopiBook **VShape**

CopiBook **OS A3**

A marvel of technologies

BoostPic

Before

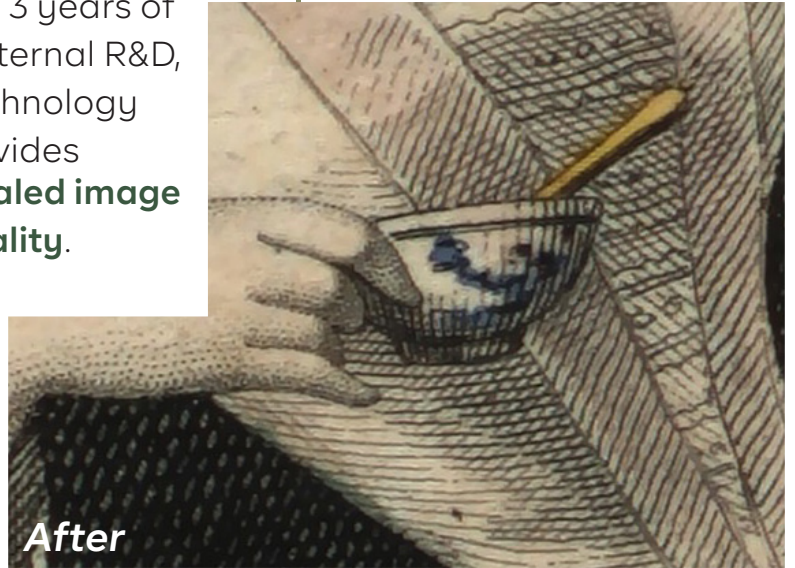

Make the finest details visible

Based on 3 years of intense internal R&D, this technology provides **an unequalled image quality.**

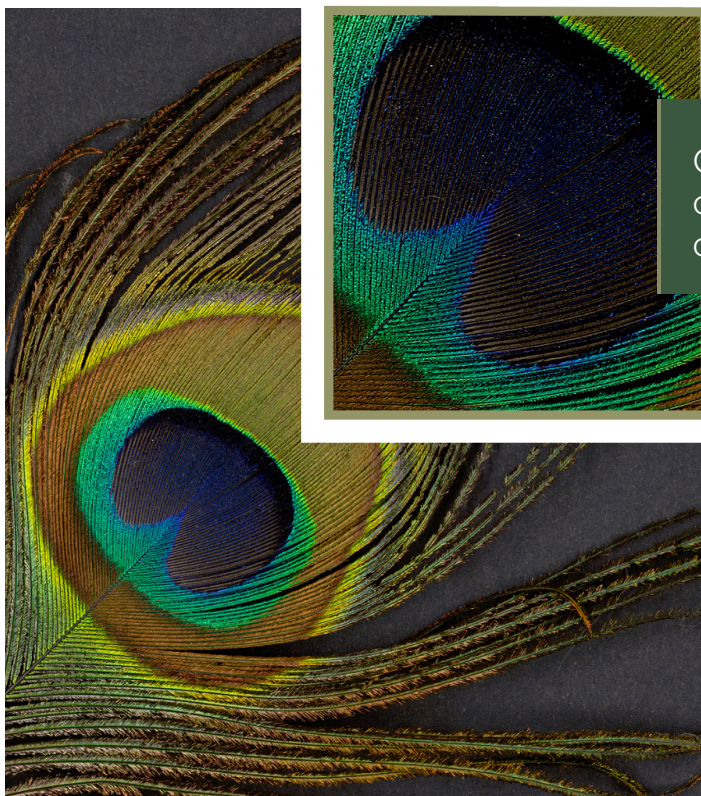

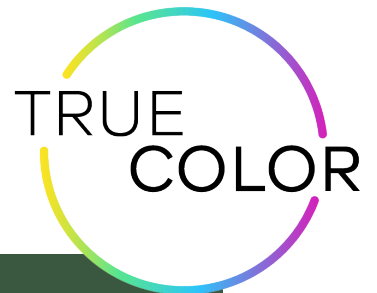

**Better sharpness
Lower-noise
Higher-contrast**

More **sharpness** and **resolution** for your digitized images.

An unique feature made possible by sophisticated algorithms combined with a **new improved scanning process.**

After

Opt for the TrueColor™ mode on the ROCK camera, opt for **faithful scanning.**

True-to-life color scanning

Based on the RGB model which specifies 256 shades for red, green and blue spaces, totaling 16 million colors.

Images taken by the camera are **clear, accurate** and with the **highest image quality** ever.
