SelfCheck SC4 AD Features & Benefits

The SC4's modular design offers libraries flexibility to adapt to evolving needs. This system supports various configurations for any space. The adjustable desk model provides expansive countertop options and height adjustment at the push of a button. Libraries can convert the unit from a kiosk to a tabletop setup effortlessly, ensuring continuous usability.

The SelfCheck includes a Touch-PC with dust protection and a durable powder-coated housing. A 22" touchscreen can be positioned in landscape or portrait orientation by staff. A laminated countertop allows for larger transactions and personal belongings. UL & CE listed and ADA/CDA-compliant, the mk SelfCheck ensures safety for staff and patrons. The SC4 includes a built-in receipt printer, barcode scanner, and RFID reader.

Patrons can check out or access their account by scanning their library card, smartphone, or entering their patron number with a PIN. Items are placed on the RFID antenna or read by the barcode scanner. If enabled, patrons can view due dates, renew items, and pay fines via mk's LibSoft software.

Libraries can enable or disable features like printing, emailing, or declining a receipt during checkout, check-in, and renewal. Optional items include card/cash payment, braille, audio, library calendar, OverDrive, and book recommendations integration.

| Convenient Code Lock | ADA Height Adjustable | Easy Access to Receipt Printer |
